Creating engagement with Smart Data

Step 1 - Real time data collection

Collecting quality data in real time from multiple sources for data integrity and accuracy. Setting the foundation for an holistic approach of data analysis.

Step 2 - Generating Smart Data

Data consolidation and filtering for optimizing products. Continuously improving through machine learning from feedback in step 1-3.

Option: Quicker insights with historical ticket data from operators

Step 3 - Optimized products

Engaging end user experiences focused on creating relevancy for users and ultimately driving conversion (registrations, deposits and turnover) for the sportsbook.

Turnkey Integration

- » Branding - We follow your guidelines to ensure full integration with your brand
- » Promotions - Prominently showcase current offers, promotions and events
- » Customization - From language to odds format to Next Bets, the app is fully customizable for a great customer experience

Betslip retargeting

Our live score apps come bundled with a betslip retargeting feature that allows your players to follow games from your sportsbook's existing betslip receipt.

For new players, the link goes to the app store and the game will be toggled on once app is downloaded.
