Automatically place bets based on user selected match events.

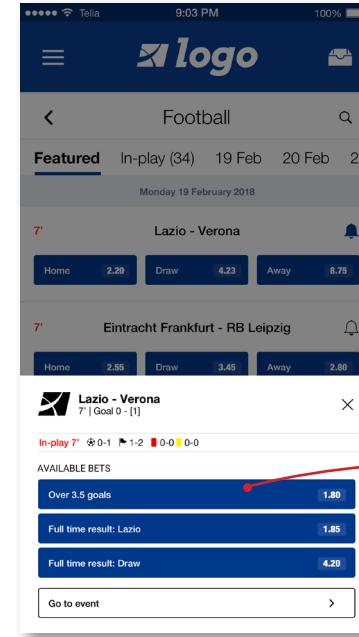

Our product offering / match notifications

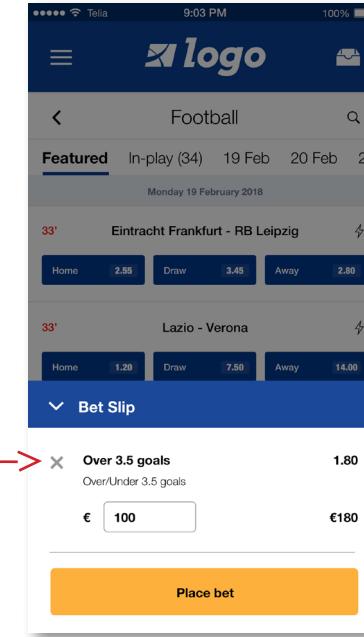

Toggle on an event to activate match notifications.

Receive notifications for web and mobile.

Each notification comes with relevant suggested bets (Next Bets).

Quickly populate betslip and place bet.

Our product offering / user customised notifications

The image consists of four mobile application screenshots illustrating the steps to create a custom notification:

- Screenshot 1:** 'Create custom notification' screen. It shows a match between Lazio and Verona on Monday, 19 February 2018, at 20:30. Below the match details, there's a section titled 'What do you want to get notified about?' with nine circular icons representing different triggers: ODDS, GOALS, MATCH TIME, CARDS, SHOTS, CORNERS, POSSESSION, ATTACKS, and LINE-UP. A red arrow points from this screen to the second one.
- Screenshot 2:** Trigger selection screen. It shows the selected outcome as 'Full time result: Lazio' with 'Current odds 1.20'. Below this, there are two options: 'Higher than' (selected) and 'Lower than'. A numeric input field shows '1.70' with a minus sign on the left and a plus sign on the right. At the bottom are 'Close' and 'Add trigger' buttons. A red arrow points from the 'Add trigger' button to the third screen.
- Screenshot 3:** Trigger configuration screen. It shows the trigger 'Full time result: Lazio Higher than 1.70' with 'Current odds: 1.20' and a 'False' status. Below it, the text 'becomes true' is followed by a large orange 'Save and close' button. A red arrow points from the 'Save and close' button to the fourth screen.
- Screenshot 4:** Home screen of the app. It shows the logo, 'Football', and a 'Featured' section for the match Lazio - Verona on Monday, 19 February 2018. Below this, there's a summary of the match result: 'In-play 7' with odds 2.20, Draw 4.23, and Away 8.75. A notification badge indicates 7 new notifications. The notification for the trigger 'Full time result: Lazio Higher than 1.70' is shown with a checkmark and the message 'Your Triggy just became true!'. At the bottom, there's a section for 'AVAILABLE BETS' with odds for Full time result: Lazio (1.85), Correct score: 2-1 (7.40), and Over 3.5 goals (1.80). A 'Go to event' button is also present.

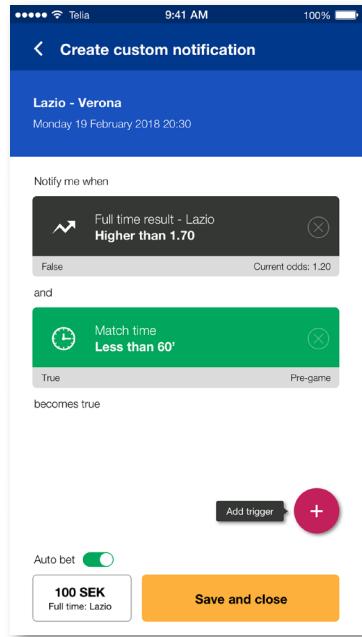

Choose a trigger to listen to.

Set the details for what you are interested in.

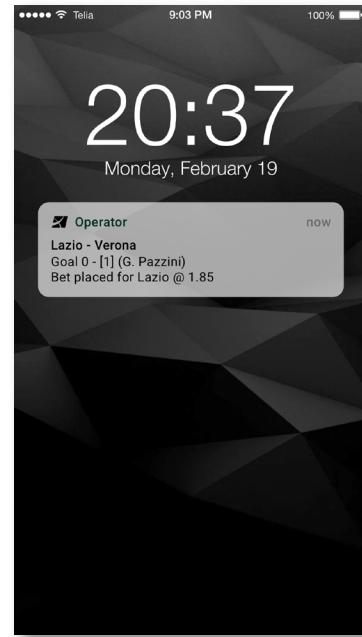

Combine with other triggers of your choice.

If all triggers become true you'll receive a notification with Next Bets.

Our product offering / Auto Place

Toggle to activate the Auto Place feature.

If all triggers become true your bet will be placed automatically.

Enabling players to live bet, without the need to follow the game.

Triggy Auto Place is an add-on function that operators can enable, giving players the possibility to schedule bets.

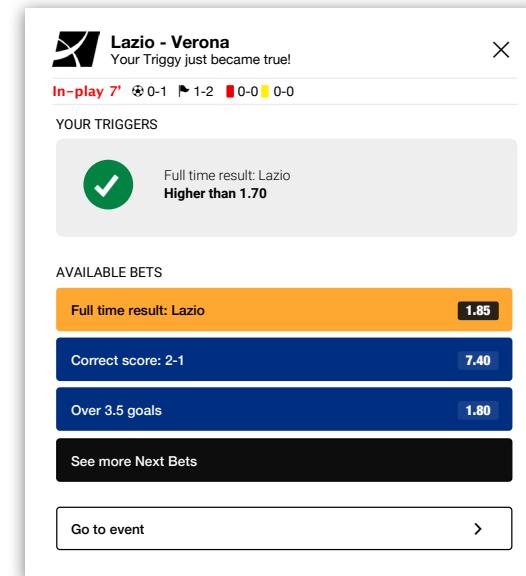

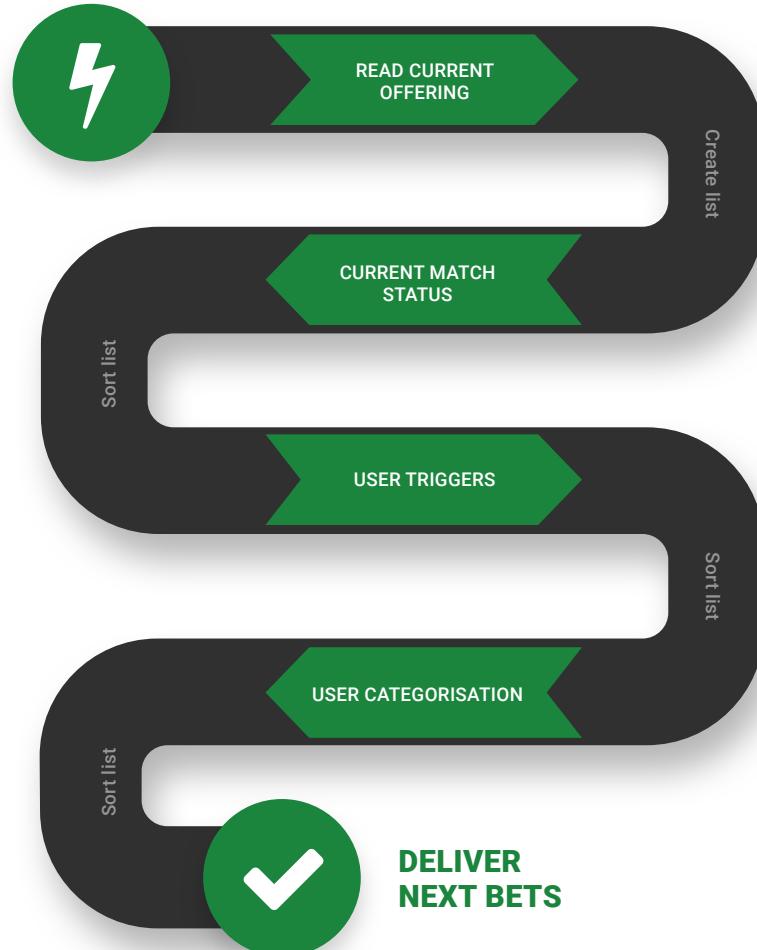

For each custom notification, players can choose to toggle on the auto place function. Players then predefines a bet they want to place.

If all triggers become true - the bet will be placed automatically.
